Based in Indonesia (5+ years)

PROFILE

Detail-oriented Junior QA Tester with a background in Quality Engineering, Project Management, and Dive Center Management. Experienced in software validation, defect reporting, technical documentation, and structured problem-solving. Currently expanding my expertise through hands-on manual testing, API testing, and personal QA portfolio projects. Passionate about software quality, continuous learning, and delivering reliable, user-focused solutions. Seeking a remote Junior QA position where I can contribute while continuing to grow as a software tester.

WORK EXPERIENCE

Dive Center Manager / PADI Instructor (2022–Present)

Application Engineer – Hexagon (2020–2021)

Project Manager – NMS (2016–2019)

Application Engineer – NMS (2015–2016)

EDUCATION

SPŠ Nové Město nad Metují
Computer Science in Mechanical Engineering
Graduated 2009

SKILLS

- Manual Testing
- Exploratory Testing
- Regression Testing
- Test Case Design
- Test Planning
- Defect Reporting
- API Testing
- Jira
- SDLC
- STLC
- Postman
- Browser DevTools

LANGUAGE

Czech - Native

English – B2 (Professional Working Proficiency)

WORK EXPERIENCE

Dive Center Manager / PADI Instructor — 2022 - Present

OK Divers – Bali / Indonesia

RESPONSIBILITIES

- Managed daily dive center operations, scheduling, and team coordination.
- Oversaw operational documentation and ensured compliance with safety procedures and quality standards.
- Conducted risk assessments and resolved operational issues in a fast-paced environment.
- Delivered training and customer support to international clients in English and Czech
- Coordinated equipment maintenance and ensured operational readiness.
- Maintained accurate records and documentation for diving activities and certifications.

Application Engineer (Quality) — 2020 - 2021

Hexagon Manufacturing Intelligence

RESPONSIBILITIES

- Performed software and hardware validation for metrology equipment.
- Executed functional testing and verified software behaviour after updates.
- Identified, documented, and reported defects to development teams.
- Participated in defect verification, retesting, and issue resolution.
- Prepared technical documentation and supported product implementation.
- Collaborated with engineers to improve product quality and reliability.

Project Manager — 2017 - 2019

NMS s.r.o.

RESPONSIBILITIES

- Managed multiple engineering projects from planning through delivery.
- Coordinated cross-functional teams and stakeholder communication.
- Monitored project risks, budgets, and schedules.
- Ensured compliance with quality standards and customer requirements.
- Prepared project documentation and progress reports.
- Led problem-solving activities to resolve technical and operational issues.

Application Engineer (Quality) — 2015 - 2016

NMS s.r.o.

RESPONSIBILITIES

- Performed quality inspections and technical verification of manufactured components.
- Analyzed measurement results and identified quality deviations.
- Prepared technical reports and quality documentation.
- Supported continuous process improvements and corrective actions.
- Worked closely with production and engineering teams to resolve quality issues.

PRACTICAL QA EXPERIENCE — 2025 - Present

Crowdtesting Platforms – uTest & Test IO

- Actively gaining hands-on software testing experience through crowdtesting platforms.
- Participating in live testing cycles for web and mobile applications.
- Performing exploratory and functional testing based on project requirements.
- Reporting defects with clear reproduction steps, expected vs. actual results, and supporting evidence.
- Collaborating with global QA communities while improving testing and bug-reporting skills.
- Working with bug tracking systems and following project-specific testing requirements.
